

SMALL CALIBRE PROPELLANTS – FOR SPORT AND HUNTING APPLICATIONS

Nitrochemie offers different propellant technologies for sport and hunting applications:

- ✓ Single base propellants for medium performances as basic for economical solutions
- ✓ EI[®] propellants for high performance applications
- ✓ EI[®]- and single base propellants with a new kind of de-coppering agent for the complete range of lead-free ammunition
- ✓ Porous propellants for the use in pistol or revolver ammunition with light-weight bullets

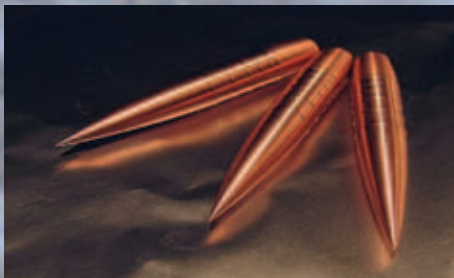

Small calibre propellants from Nitrochemie have the following advantages:

- Well-balanced temperature behaviour in a wide area of applications
- Small standard deviations as basic for excellent precision
- Low weapon erosion by application of an additive in combination with low flame temperature
- Toxicological safe formulation. DNT free
- Excellent ability for lot to lot reproduction. Logistical advantages arise thereby for the ammunition manufacturer
- No loss of precision during the application of lead-free ammunition in combination with new de-coppering agent

Nitrochemie small calibre propellants for more satisfaction at the shooting range!

Name	Single base propellant	El® propellant	Porous propellant	Vivacity	Typical use	
El®-Niesen 95		✓	✓	Fast	.22 long rifle	
El®-Niesen 98		✓	✓	↓	9 mm x 19	
El®-Niesen 110		✓			.222 Rem	
El®-Niesen 130		✓			.308 Win	
El®-Niesen 145		✓			8 mm x 68 S	
El®-Niesen 150		✓			Slow	.300 Win Mag
9 mm Pist Pat	✓		✓	Fast	9 mm x 19	
WLP 190	✓		✓	↓	.22 hornet	
WLP 210	✓				.222 Rem	
WLP 200	✓				.30 – 30 Win	
WLP 220	✓				.308 Win	
WLP 222	✓				6.5 mm x 55	
WLP 225	✓				.270 Win	
WLP 240	✓				.300 Win Mag	
WLP 250	✓				Slow	.338 Lap Mag
